MUHAMMED SHAFEEQ

Healthcare Data and Business Analytics | Data Quality
Malappuram, Kerala | +91 8086953877 | plrshafeeq@gmail.com| LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Healthcare documentation and quality professional with nearly seven years in US healthcare documentation, EHR workflows, data validation, and quality reporting. Certified in data analytics (2025) and now, a Business Analytics at Penoft, preparing BRDs and building Power BI dashboards, with SQL, Excel, and Python skills. Winner of Best Power BI Dashboard, Technite 2025. Seeking Business Analyst, Healthcare Data Analyst, and healthcare data quality roles.

SKILLS

Healthcare and Domain: EHR Workflows (Epic, Allscripts, Cerner), Healthcare Documentation, Medical Terminology, HIPAA-Compliant Documentation, Healthcare Data Quality

Analytics and BI: Power BI, Power Query, DAX, Data Modelling, Dashboard Development, KPI Reporting, Data Visualization, Exploratory Data Analysis, Trend Analysis

Programming and Data: SQL (MySQL), Joins and Aggregations, Data Extraction, Python, Pandas, NumPy, Matplotlib, Data Cleaning, Data Validation

Business Analysis: Business Requirements Documents (BRD), Requirements Documentation, Process Documentation, Stakeholder Communication, Cross-Team Coordination, Quality Reporting

Tools and Platforms: Advanced Excel (PivotTables, VLOOKUP, INDEX-MATCH, etc), Power BI Desktop, MySQL, Epic, Allscripts, Cerner

PROFESSIONAL EXPERIENCE

Business Analyst| Penoft, Kochi, India — Aug 2026 - Present

- Prepare Business Requirements Documents (BRDs) as part of a team documenting requirements for multiple client websites, structuring business needs into clear, reviewable deliverables
- Contributing to BRD preparation for an upcoming in-house project, supporting requirements documentation from the start
- Built a live Power BI dashboard for a combined client engagement (Ebsor and BGC Trading LLP), turning a business reporting need into a working dashboard

Quality Trainer/Process Specialist | Cognizant, Bengaluru, India — 07/2023 - 11/2024

- Performed systematic quality checks on patient documentation, identifying data inconsistencies and resolving documentation queries to support accurate clinical workflows
- Prepared and reviewed daily and weekly quality reports, tracking documentation metrics and flagging inconsistencies to stakeholders
- Acted as point of contact between operations and quality teams, coordinating to resolve data discrepancies, update records, and maintain compliance with documentation standards

Special Teams Quality Documentation Specialist | Nuance, Bengaluru, India — 07/2021 - 07/2023

- Tracked operational KPIs and prepared routine reports to support team performance monitoring, trend analysis, and process improvement
- Maintained process documentation, coordinated data requirements across teams, and supported audit preparation and accuracy checks

Ace Medical Scribe | OG Healthcare, Bengaluru, India — 02/2018 - 07/2021

- Documented and validated clinical data in Epic, Allscripts, and Cerner EHR systems alongside physicians in real time
- Maintained structured patient records that supported data accuracy for reporting and compliance; first point of contact for documentation queries
- Applied medical terminology and HIPAA-compliant documentation practices to maintain data integrity across records

PROJECTS

NHS Emergency Readmissions: Trend and Pattern Analysis | *Python, Power BI* | GitHub

Analysis of NHS emergency readmissions data (2013 to 2024) across the UK, covering trends and reporting patterns by age group and region.

- Cleaned and transformed the data using Python (Pandas, NumPy) and created 15+ exploratory visuals to identify patterns and outliers across demographic and performance segments
- Developed a one-page Power BI dashboard with KPIs, rankings, and readmission trend lines, highlighting higher readmission burden in the 75+ age group, COVID-era disruption, and regional differences in care

Food Delivery Analytics: SQL and Power BI Operational Reporting | *MySQL, Power BI* | GitHub

SQL and Power BI analysis of 1,200+ orders, 50 restaurants, and 10 cities covering revenue, delivery efficiency, and customer behaviour.

- Designed and queried a normalized relational database in MySQL to track order volumes, revenue distribution, and delivery performance
- Cleaned and validated data in MySQL by removing invalid records, resolving inconsistencies, standardizing categories, and correcting data types
- Built a live Power BI dashboard connected to MySQL via ODBC, tracking revenue, average order value, order volume, and delivery time; identified 140+ minute delay outliers pointing to operational bottlenecks

Fitness Membership Analytics (IronCore Gym): Excel Reporting and KPI Tracking | *Excel* | GitHub

- Segmented members using RFM analysis with Excel formulas and PivotTables to support retention and revenue prioritization
- Conducted cohort analysis of monthly retention to identify churn patterns and peak drop-off periods
- Used data validation, VLOOKUP, INDEX-MATCH, and IF-based logic to clean and transform raw records for accurate reporting

ACHIEVEMENT

Best Power BI Dashboard Award and Overall Champions | Technite 2025 (24-Hour Build Battle, Entri HQ, Kochi)

- Built two interactive dashboards (job market analytics and academic performance benchmarking) within 24 hours as part of a cross-functional team of 4

CERTIFICATIONS

Certification in Data Analytics | Illinois Tech, US | Nov 2025

Data Analytics Certification | NSDC / Entri Elevate | Oct 2025

- Earned dual certifications demonstrating global and national proficiency in analytical methods
- Developed and demonstrated expertise in Microsoft Excel, Power BI, MySQL, and Python
- Trained to deliver insightful dashboards and concise reports tailored for business decision-making and stakeholder communication

EDUCATION

B Sc Computer Science | Calicut University, Kerala
